## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
1. Claim 27-38, 50-51, 53-54, 56-58, 60-71, 73-81 rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sherry (US 6716805). The details of the rejection can be found in paragraphs 3 of the Office Action of 5/18/2006. This rejection is maintained.

### ***Response to Arguments***

2. Applicant's arguments filed 11/22/2006 have been fully considered but they are not persuasive. Applicant states that Sherry, et al. fails to teach all the limitations in claims 27 and 35, specifically the limitation of Kill Efficiency Ratio and the benzalkonium halide is present within a released solution less than 2000 ppm while attaining a high

log reduction for E. coli, S. Aureus or both. While Sherry does not teach a Kill Efficiency Ratio and does not teach a benzalkonium halide concentration of less than 2000 ppm in the released solution, Sherry teaches the structure and composition of the current applications sanitizing wipe. Applicant's claims do not disclose a time period for antimicrobial activities. Applicant argues that the benzalkonium halide is not present in the claimed amount in the released composition, but since Sherry teaches the benzalkonium halide in the composition, which is contained in the wipe in the claimed amount, it is reasonable to presume that it would be present in the released composition in the claimed amount. Applicant argues that Sherry teaches away from the claimed invention because it teaches the wipe has a property of being 99.9% cidal against bacteria and other microorganisms for a period of from about 8 to about 72 hours. The argument is not persuasive since the property of how active or effective the material is against bacteria is not necessarily due to a particular amount of the benzalkonium halide and that since the sanitizing formulation contains the same materials the examiner is assuming it has the same properties and Applicant bears the burden of showing otherwise. When the reference discloses all the limitations of a claim except a property or function, and the examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention the examiner has basis for shifting the burden of proof to applicant as in *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980). See MPEP §§ 2112- 2112.02

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
